BLOWER PACKS

PARAGON™

Kubota

NEW LIQUID COOLED KUBOTA ENGINE WITH PARAGON P857 BLOWER

- All-in-one, Self-Contained unit. You can mount it on a silo, bolt it to a utility trailer, or put it on a pallet and have it wherever you need it, all the time. Versatility is king!
- Built with a V3600 Kubota diesel engine with 84hp and up to 3600 rpms that has an adjustable position, electronic automatic start. The most convenient set-up industry wide!
- Custom built gas tank in the frame. This one-of-a-kind build reduces the footprint of the unit and makes for the best design in the industry.

- Built with a Paragon P857 Blower, capable of producing up to 700cfm. This lightweight, pneumatic blower is designed for the peak of efficiency and our team is always available to assist with maximizing your offload times.
- Proudly manufactured in Kansas City, KS.

The P857 is a two lobe, positive displacement blower designed specifically for the unloading of dry bulk road tankers.

Corporate Headquarters :: Kraft Tank Corporation, 320 Kindleberger Rd, Kansas City, KS 66115
